Release 23/12/2014

Junior Sedan Technical Specification Release

Please be advised that the following *Technical Specification* change has been approved and will be implemented immediately. **Junior Sedans – Page 45. Section. 21a, Exhaust System.**

Specification currently reads:

21. (a); "Exhaust manifold including the exhaust flange to be OEM standard".

Remove the wording; *"including the exhaust flange"*

Add additional wording; *"Original casting marks must be visible", "No modifications to any part of the OEM standard manifold is allowed"*.

New specification wording:

21. (a); Exhaust manifold to be OEM standard. Original casting marks must be visible, No modifications to any part of the OEM standard manifold is allowed.

21. (b); Remainder of exhaust is free, provided that it has not more than one outlet pipe, it is vented to the side or the rear of the vehicle behind the driver and does not protrude beyond the body line.

Reason;

OEM standard exhaust flanges in a number of cases can no longer be purchased as a replacement part.

For the purpose of policing the specification, the OEM standard manifold will remain and the remainder of the exhaust will be free inclusive of the flange plate.

Implementation Date

*Immediate implementation.
