## Street Stock Technical Specification

Please be advised that the following Street Stock Technical Recommendation and Clarification have been accepted with immediate implementation.

### RECOMMENDATION

Specification Book Page No 14 Section 11 Rule No A

#### To be added

*All new street stocks built be four door sedans and not sports models.*

#### Recommendation to read:

*A street stock class car is built from a hard top road car seating a minimum of four persons, as per the compliance plate, and catalogued for sale in Australia. I.e. Available new, to the general public, through authorised dealer service networks throughout Australia. All new street stocks built be four door sedans and not sports models.*

### CLARIFICATION

Specification Book Page No 28 Section 18 Rule No P

#### DELETE THE FOLLOWING:

*"Protective wire gauze or air cleaner to be fitted over air intake to prevent entry of foreign objects to the throttle body and also to act as a flame trap."*

#### Clarification to read

*A standard air box must be used Holden to Holden, Ford to Ford. No extra holes to be drilled or cut in the air box. A standard replacement air filter element must be fitted. A pod filter may be fitted to the inlet of the air box. OEM air filter and air flow metre maybe in the cabin or moved under the bonnet. Air filter inlet to be shrouded from the driver. Air box must be under the bonnet with passenger in the car.*

#### Reason:

*Pod filters were being used inside the air box*
